

We're looking for a few good reps!

ESD Series Sinewave lighting dimmers

Every so often a new technology is developed that presents exciting ground-floor opportunities. The achievement of a digital electronic dimmer for HID and fluorescent lighting has been a much sought after product for decades. Sinewave Energy Technologies has achieved the impossible with the new ESD Series dimmers!

The applications are huge - as huge as the installed base of HID and T12 & T8 lamps, including athletic facilities, parking garages and lots, warehouses and manufacturing areas, schools, etc. Beta sites throughout North America have proven not only the technology, but the tremendous opportunities that are available to sales agents of Sinewave Energy Technologies.

Sales Model

We are seeking manufacturer's agents who are involved in commercial and industrial lighting, and are looking for a direct sales product line with high potential. Although the product line may eventually also sell through distributors via our agents, we feel that the initial opportunities are best by direct sales to customers and installers – an initial push that can only come from seasoned manufacturer's agents such as yourself. Accordingly, in each sales region, we will be appointing exclusive sales agents.

Automated sizing, quoting and ordering tools are now being created and will be available within weeks. We fully understand how Reps work and what motivates them: 1) Money, 2) Ease of sale, 3) No hassles from the factory. Sinewave is in a position to deliver on all of these.

If you would like to explore joining us, please send or email your agency's line card, resume, and territory information. Our interest is in long-term relationships with win-win situations.

Looking forward to hearing from you!

Sincerely yours,
Sinewave Energy Technologies, LLC

D. Scott Herr
Vice President, Sales & Marketing
